DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 5-6, filed 7/25/2007, with respect to the previous ground of rejection have been fully considered and are persuasive.

Specifically, the applicants argue that "Liu fails to teach or suggest that the heat emitting surface is used to selectively heat a reactant so as to facilitate a local chemical reaction for forming or altering a submicrostructure on the local region". This argument is pervasive. Thus, the previous ground of rejection has been withdrawn.

Allowable Subject Matter

2. Claims 1, 3-17 are allowed.

3. The following is an examiner's statement of reasons for allowance: The cited prior arts fail to disclose or suggest the step of selectively heating the at least one reactant on the local region using the heat emitting surface of the heating means to facilitate in the local region a local chemical reaction for forming or altering a submicrostructure on the local region in combination with all other limitations in the claims. The closest prior art, Liu (US 6642129), discloses the heat emitting surface are used to actuate the cantilevers, so as to induce movement of probe tips in relation to substrate.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binh X. Tran whose telephone number is (571) 272-1469. The examiner can normally be reached on Monday-Thursday and every other Friday.
